 - **Process complexity** is rising due to 81% regulatory complexity (81%), branching and conditional logic (57%), and legacy systems that are difficult to connect (54%)
 - 85% say they have not reached the right level of **process maturity** to implement agentic orchestration
- Agentic Orchestration Across Industries
 - **Banking**: 360K hours saved through AI contract analysis
 - **Insurance**: 25% improved customer satisfaction through AI-powered risk assessment
 - **Healthcare**: 30% reduction in unnecessary procedures with AI diagnostics

NEW YORK CITY · SEPTEMBER 2026

Stop bolting agents onto **broken processes**.

The Great Process Re-Engineering

71% of enterprises have deployed AI agents. Only 11% reached production. The problem is not the AI — it is the processes underneath. This session is for the architects, practitioners, and transformation leads who have to fix that.
